Catalogue 2012-2013

 **CVL[®]
DRUMS**

www.cvl drums.com

Breaking news in the field of percussions!

CVL has patented a new line of percussion instruments for drummer and percussionist who wants the very best sound in every performance, live and not.

Not only new instruments, but also the existing percussions have been optimized thanks to the closed collaboration with our musicians.

CVL takes care not only the sound but also a new design entirely made in Italy that offers the possibility to customize percussion finishing.

CVL Drums adopts the international quality system ISO 9001 also for percussions instruments.

woods, glues, varnishes must pass strictly tests when they arrived to CVL plant and they must respect several rules of conservation.

This allows to rebuild the story of single product to give the traceability, to give the warranty (until 5 years) but in particular to offer to the customers the possibility to add new shells with not only the same finishes but also the same sound features thanks to the same wood selection, treatment and working.

A warranty of great quality, certified and of endurance that is the main features of CVL Drums product.

A great sample of quality, certified and of endurance that comes from CVL Drums.

Ø 128mmx124mm

Ø 141mmx124mm

Ø 176mm x124mm

Ø 193mm x124mm

Different colours available

percussion

CVL has a long experience in lacquer/varnish process, this experience introduces the drummer into a world of infinite colours without any cover or wrap. CVL uses very elastic lacquer/varnish to leave the maximum vibration of the wood and to ensure the long life of the finishes.

A working-process made completely by hand by skilled workers, that are able to apply many thin layers of lacquer/varnish without defects, leaving the best smooth surface.

NATURAL CAJON PRO

A wide choice of shiny finishes and colours, especially designed to highlight the beauty of wood and wooden veneer.

Colours are tested for lasting, without any change in aging and the lacquer surface is studied to be shock-resistant. CVL paints are slightly different depending on the type of wood on which they are applied.

SPECIAL EXTERNAL WOOD NO EDGE CAJON

Particular and gifted external sheets of wood as the "zebrano" or painted woods worked with innovative techniques. These last wooden sheets are glued directly into the main moulding, looking to drawing of veneers.

OPEN OR CLOSE POPE MAT

CVL presents the cheaper finish line called "satin-mat"!

This finish allows to see the wooden veneers or less, you can feel them with your hand on shell surface, and it makes special lighting effects.

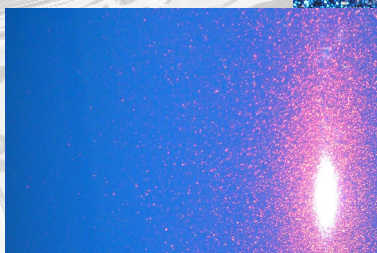

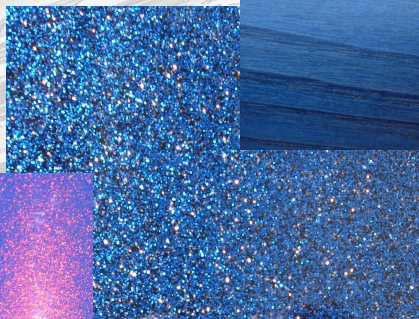

SPECIALS

Special colours, like nacre/pearl or the chameleon, Even in this case, CVL doesn't use a cover, but only innovation and imagination ...

Special effects or varnish to create special finishes

CUSTOM

Custom colours from your fantasy or your sample
